

TANUJ GUPTA

Software Engineer (Backend & Cloud)

+91-9644398102 tanuj.gupta.work@gmail.com linkedin.com/in/tanuj-gupta-work/ India

SUMMARY

I am a Software Engineer with over 3 years of experience specializing in backend and cloud technologies. I have a solid expertise in designing scalable distributed systems and cloud-native applications. My skills include designing microservices architectures and event-driven systems, as well as developing REST APIs that are robust and performance-oriented. I have a proven record of delivering production-grade systems that significantly enhance operational efficiency

EXPERIENCE

Software Engineer

WatchGuard Technologies

04/2025 - Present Noida, India

WatchGuard Technologies is a cybersecurity company that provides solutions focused on secure network performance

- Designed hierarchical multi-tenant access control system, enabling 10x scalability in account relationships
- Migrated from 1:1 mapping to hierarchy-based architecture, reducing authorization complexity by ~40%
- Built high-performance FastAPI services, reducing API latency by ~30%
- Implemented RBAC and JWT authentication, reducing unauthorized access issues by ~60%
- Created event-driven workflows using SQS and DynamoDB Streams, improving throughput by ~50%
- Reduced production issues by ~30% through robust validation and edge case handling

Associate Software Engineer

WatchGuard Technologies

08/2023 - 04/2025 Noida, India

WatchGuard Technologies is a cybersecurity company that provides solutions focused on secure network performance

- Integrated breach detection APIs to monitor thousands of domains/emails
- Built near real-time alerting system (<5 mins delay), improving response time significantly
- Improved alert processing efficiency by ~40% using scalable backend workflows
- Developed Angular dashboard, reducing manual tracking effort by ~50%

Intern

WatchGuard Technologies

01/2023 - 08/2023 Noida, India

WatchGuard Technologies is a cybersecurity company that provides solutions focused on secure network performance

- Planned a full-stack platform using Angular and FastAPI
- Built serverless backend reducing infrastructure cost by ~40%
- Implemented CI/CD pipelines reducing deployment time by ~50%
- Delivered end-to-end features independently

Intern

DRDO

06/2022 - 07/2022 Gwalior, India

IT intern

- Deployed an internal IT inventory management system for the DRDO network, **automating asset tracking processes and reducing manual workload by 40-50%**, leading to improved data accuracy and faster operations.

EDUCATION

B.Tech

Manipal University Jaipur

08/2019 - 05/2023 Jaipur, India

SKILLS

Python	AWS	Angular	Microservices	
REST	JWT	SQS	SNS	S3
DynamoDb	Serverless		JavaScript	
TypeScript	SQL	AWS Lambda		
API Gateway		Jenkins	New Relic	
Sonar	Pytest	Docker	Git	

PROJECTS

Current Project

04/2025 Remote

Delegation & Access Control System

- Designed hierarchical multi-tenant access control system, enabling 10x scalability in account relationships
- Migrated from 1:1 mapping to hierarchy-based architecture, reducing authorization complexity by ~40%

Project

08/2023 - 04/2025 Remote

Dark Web Monitoring System

- Integrated breach detection APIs to monitor thousands of domains/emails
- Built near real-time alerting system (<5 mins delay), improving response time significantly

Project

01/2023 - 08/2023 Remote

Kudos Platform

- Developed full-stack platform using Angular and FastAPI
- Built serverless backend reducing infrastructure cost by ~40%
